

Floric Epamine™ Metallics FX

There is no other system that has the appeal, depth, character, metallic luster, and three-dimensional visual effect of Epamine™ Metallics FX! Floric has surpassed everyone in the industry with a proprietary blending method of metallic pigments and industrial grade epoxies. It's the marriage of industrial grade epoxies and artistry in flooring to create a Picasso in epoxy.

Epamine™ Metallics FX is both federal and state V.O.C. (Volatile Organic Compounds) compliant because it contains zero V.O.C (solvent-free.) It has metallic integral pigment that give a variegated three-dimensional look and is also available in color-shift pigments. When incorporated with high-performance, chemical resistant urethane or polyaspartic topcoats, you can create an easy to clean, virtually maintenance-free surface. The result is a unique floor able to stand up to almost anything.

Typical uses include:

- Showrooms
- Garage floors
- Dance floors
- Casinos
- Entertainment Centers
- Museums
- Retail Store Floors
- Lobby Flooring
- Malls and Super stores

Technically, Epamine™ Metallics FX is an interior grade, multi-component, 100% solids high gloss decorative epoxy floor coating system. It's a multi-coat product with the metallic pigment integral to the epoxy itself. The product has excellent adhesion, cleanability and abrasion resistance. Epamine™ Metallics FX is available in Royal Blue, Glitter Gold, Glitter Bronze, Copper, Brilliant Aluminum, Antique Silver, Old English Pewter, Driftwood and Forest Green. Also available in Color-shift pigments: Viola Fantasy and Tropical Sun.

Epamine™ Metallics FX is fluid applied in a multi-coat process with a primer coat, metallic body coats and topcoats. It utilizes a liquid dispersing agent to distress the metallic pigments for producing a highly decorative, three dimensional and variegated seamless epoxy floor coating. The application can incorporate anti-microbial additives where needed. It can be installed anywhere conventional floor coverings or industrial coatings are required resulting in practically unlimited uses.

Floric Polytech manufactures scientifically proven, field tested polymer based products. We work as a team with architects and contractors to insure the best, longest lasting installation available. Our product lines include industrial coatings, architectural cementitious toppings, concrete restoration materials, deck coatings, waterproofing membrane systems and many other innovations. Whether for topical coloration of surfaces or industrial strength coatings for high levels of moisture vapor emission and thermal shock, we don't just supply products – we also educate architects and contractors in high performance surfaces.

Full Technical Data Sheets with in-depth details about each of our products are available upon request.
